

# Kunsthauusspiel

„Get rid of your paintings quickly if possible“  
A card game to bring art closer to young people.

## Initial situation

The game is intended to provide young people in particular with an entertaining encounter with images, but ultimately to be fun for all age groups. The focus should be on bringing art closer in general and on conveying the experience of art in particular.

Observing, assessing, comparing and classifying creates visual references to the individual works and encourages curiosity about the originals and their history.

## Solution

2 to 6 players are asked to look closely at the 37 paintings from the collection of the Kunsthaus Zürich. On the basis of 8 predefined design or chronological criteria, the players try to bring their cards into play. The creative approach is based on direct perception of the works, while the temporal aspect requires a little knowledge of art historical contexts. With a joker card, one can challenge one's luck at any time.

Kunsthauusspiel is a game developed by game solution ag especially for the Kunsthaus Zürich.
